

REMARKS/ARGUMENTS

Election/Restrictions

Applicant has affirmed the election to prosecute the invention of group 2, claims 10-42.

Claim Objections and Rejections

The Examiner has objected to Claims 10, 11, and 42.

Appropriate correction has been made to claim 42.

The Examiner has rejected Claims 10, 11 , 12, and 13.

These claims have been canceled.

The Examiner has indicated that Claims 14 through 41 “would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.”

These claims have been so rewritten. The rewriting also made the corrections identified by the Examiner for Claims 10 and 11.

The Examiner also courteously indicated “Claim 42 would be allowable if rewritten or amended to overcome the objection.” As indicated above, this has been done.

Applicant respectfully requests the Examiner to allow Claims 14 through 42.

DATED this 1st day of May, 2006.

Respectfully,

Nolan T. Brooks
